# KMK 224

RS485 VERSION

REDZ KMK224 RS485 version designed to be used with Honeywell Dolphin CT50/CT60 handheld units (HHU). It allows direct connection to RS485 interface of Electricity Energy Meters by converting USB of HHU to RS485 electrical interface. It creates a virtual serial port on HHU so that the software for meter reading can use that interface to directly read meters.
